Professional Appointments

- 2022 – on **Research Assistant Professor**
Department of Civil and Environmental Engineering
Faculty of Construction and Environment
The Hong Kong Polytechnic University, Hong Kong
- 2021 – 2022 **PolyU Distinguished Postdoctoral Research Fellow**
Department of Civil and Environmental Engineering
Faculty of Construction and Environment
The Hong Kong Polytechnic University, Hong Kong

Education

- 2018 – 2021 **Ph.D. in Department of Civil and Environmental Engineering**, Stanford University, USA
- 2016 – 2018 **M.Sc. in Department of Civil and Environmental Engineering**, Stanford University, USA
- 2012 – 2016 **Undergraduate Minor in Applied Mathematics**, Tongji University, China
- 2012 – 2016 **B.Eng. in Civil Engineering**, Tongji University, China

Interests

- Academic I am interested in understanding and controlling the fundamental poro-mechanical processes that determine the formation and recovery of earth resources from sedimentary rocks to achieve energy and environmental sustainability. At present, my research is focused on formulating innovative theories and developing advanced numerical methods to investigate the **multi-scale** pore structures, **multiple** fluid flow patterns, and complex **multi-physics** processes. Additionally, I am exploring the effects of bedding-induced **anisotropy**. This comprehensive investigation is aimed at facilitating a transition towards sustainable energy practices, and our results should be applicable to general porous media with slight modifications. By integrating rock experimental testing data (such as the poroelasticity constants) with poromechanics and solid mechanics theory, my team and I aim to build predictive models that can enhance our understanding of shale behavior and contribute to more efficient and sustainable energy extraction practices.

Teaching My primary teaching objective is to equip students with a solid foundation in geomechanics, fostering their ability to think critically and innovatively. This will enable them to meet the increasing societal demands for energy and environmental sustainability. I am passionate about nurturing their capabilities and enthusiasm for advancing fundamental knowledge in geomechanics. I am keen on teaching both fundamental and applied courses in areas such as rock and soil mechanics, solid mechanics, finite element method, and elasticity and inelasticity. I also aim to offer general courses in geotechnical engineering to cultivate the upcoming generation of leaders in the field of geomechanics.

Grants & Fellowships

- 2023 – 2024 “Development of a novel geomechanical model for MHBS that incorporates effects of viscoplasticity, temperature, anisotropy, and non-Darcy flow”. **PI: Zhang, Q.** Main Funding Body: Start-up Fund for RAPs under the Strategic Hiring Scheme. Award Number: P0043879. Total Awarded Amount: HK\$250,000
- 2022 – 2025 “Finite-Discrete modeling of mechanical behaviors of heterogeneous rocks with irregular inclusion or voids from micro to macro with experimental validation”. **PI: Yin, Z.-Y.; Co-I: Zhang, Q.** Main Funding Body: Shenzhen Poxon Machinery Technology Co.,Ltd. Award Number: P0038726. Total Awarded Amount: HK\$360,000
- 2022 RGC Postdoctoral Fellowship Scheme (PDFS). **Zhang, Q.** Main Funding Body: University Grants Committee (UGC). More information: [List of Awardees \(2022/23\)](#). The **first awardee** in the Department of Civil and Environmental Engineering at PolyU.
- 2021 PolyU Distinguished Postdoctoral Fellowship. **Zhang, Q.** Associated Project Title: “On the Constitutive Modeling of Natural Gas Hydrate Bearing Sediment and Multi-physics Coupling in Gas Production”.
- Pending “Computational thermo-hydro-chemo-mechanics for multiphase reactive porous media in the finite deformation range”. **PI: Zhang, Q.;** Co-I: Yin, Z.-Y., Jha, B. Main Funding Body: Research Grants Council General Research Fund (RGC-GRF). RGC Ref. Number: 15211124.

Open Science

Open-source Software

- 2022 – on **GEOKEYFEM_HM** | 
Smoothed Finite Element Methods (S-FEM) tools for hydromechanical analysis that could consider rigid-to-soft contact, transverse isotropy induced by sedimentary rock bedding, double porosity, and gas compressibility.
Role: Creator, main developer, project leadership
- 2021 – on **COMSOL for double porosity** | gitee.com/qzhang94/source-code-arXiv-2311.12877
COMSOL Multiphysics implementation for the preferential flow patterns induced by transverse isotropy and non-Darcy flow in double porosity media.
Role: Creator, main developer, project leadership

Academic Service

Editor

- 2022 Guest Editor of Special Feature [Multiscale Multiphysics Modeling in Geotechnical Engineering](#), *Journal of Zhejiang University - SCIENCE A*
Yin, Z.-Y., **Zhang, Q.**, LAOUAFA, F.
- 2022 Guest Editor of Special Issue [Exploitation of Geological Resources in Unconventional Reservoirs](#), *Energies*
Yan, X., **Zhang, Q.**, Liu, L.
- 2021 – 2023 Youth Editorial Board, *Advances in Geo-Energy Research*

Memberships in Professional Societies

- 2016 – 2020 Student member, *Chinese Society for Rock Mechanics & Engineering*.

Reviewer

- Acta Geotechnica
- Applied Energy
- Computers and Geotechnics
- European Journal of Environmental and Civil Engineering
- Gas Science and Engineering (Formerly known as *Journal of Natural Gas Science and Engineering*)
- Geoenergy Science and Engineering (Formerly known as *Journal of Petroleum Science and Engineering*)
- Géotechnique Letters
- International Journal for Numerical and Analytical Methods in Geomechanics
- International Journal for Numerical Methods in Engineering
- International Journal of Environmental Science and Technology
- International Journal of Rock Mechanics and Mining Sciences
- Journal of Cleaner Production
- Journal of Zhejiang University-SCIENCE A
- KSCE Journal of Civil Engineering
- Mathematical Methods in the Applied Sciences
- NeurIPS ML4PS workshop (ml4physicalsciences.github.io)
- Renewable Energy
- Rock Mechanics and Rock Engineering
- Soils and Foundations

Conference Convener

- 2024 Mini-symposium: Computational Geomechanics.
Wang, Y.T., Wang, Y.D., Liu, F.S., Zhu, C.W., **Zhang, Q.**, Semnani, S.J., Wu, W., Borja, R.I.
EMI 2024 IC, TU Wien, Vienna, Austria.
- 2023 Mini-Symposium S25: Computational Geomechanics and Multiphysics Coupling in Porous Media.
Zhang, Q., Yan, X., Zhang, K., Zhang, Z., Jin, Y.-F.
ICCES2023, Shenzhen, China.

Awards & Honors

- 2020 – 2021 **John A. Blume Research Fellowship**, Stanford University
- 2018 – 2020 **Charles H. Leavell Graduate Student Fellowship**, Stanford University
- 2016 – 2018 **Stanford School of Engineering Graduate Fellowship**, Stanford University
- 2016 **Outstanding Bachelor Thesis Award**, Chinese Society for Rock Mechanics & Engineering
- 2016 **Excellent Graduate of Shanghai**, Shanghai Municipal Education Commission
- 2014 – 2015 **National Scholarship of China** ×2, Ministry of Education of the People's Republic of China
- 2013 – 2015 **First-Class Academic Scholarship of Tongji University** ×3, Tongji University
- 2013 **Excellent Student of Tongji University**, Tongji University
- 2015 **First Prize** in the National Pei-Yuan Zhou **Mechanics Contest** of Shanghai Division, Chinese Society of Theoretical and Applied Mechanics
- 2014 **First Prize** in the National **Mathematics Contest** (Finals), Chinese Mathematical Society
- 2013 **First Place** in the National **Mathematics Contest** of Shanghai Division, Shanghai Mathematical Society
- 2013 **First Prize** in the Regional College Students **Physics Contest**, Shanghai Physical Society

Teaching

Graduate Courses

- 2023 – 2024 CSE583: Analytical and Numerical Methods in Geotechnical Engineering
Teaching introductions to vectors and tensors, fundamentals of solid mechanics, ultimate state analysis, and slope stability analysis. (40% of module)
The Hong Kong Polytechnic University
- 2023 – 2024 CE620: Research Methods
Teaching basics of probability, point estimation, confidence interval, and hypothesis testing. (25% of module)
The Hong Kong Polytechnic University
- 2022 – 2023 CSE583: Analytical and Numerical Methods in Geotechnical Engineering
Teaching introductions to vectors and tensors, fundamentals of solid mechanics, ultimate state analysis, and slope stability analysis. (40% of module)
The Hong Kong Polytechnic University Teaching evaluation
4.8/5.0

Teaching Assistant

- 2018 CEE 294: Computational Poromechanics
Give tutorials on the use of ANSYS to solve boundary-value problems, hold weekly office hours, and grade homework submissions.
Stanford University

Student Supervision

Ph.D. mentored

- 2021 – on Xian-han WU
Research topic: *Implicit SNS-PFEM with dual mortar method for thermo-hydro-mechanical large deformation submarine pipeline-soil interaction problems.*
The Hong Kong Polytechnic University & Southern University of Science and Technology
Advisor: Prof. Yin, Z.-Y.; Prof. Feng, W.Q.
- 2023 – on Zi-qi TANG
Research topic: *Coupled thermo-hydro-chemo-mechanical modeling in gas hydrate production.*
The Hong Kong Polytechnic University
Advisor: Prof. Yin, Z.-Y.

M.Sc. in Civil Engineering

- 2023 – on Zi-kang HUANG
Thesis: *Formulation and implementation of fully implicit 2D reservoir simulator considering permeability anisotropy and heterogeneity.*
The Hong Kong Polytechnic University
